

Power Automate Consumption Analyzer

Identify licensing opportunities from Power Platform API request exports

Drop Power Platform export file here

or click to browse — supports .csv, .xlsx, .xls (up to 100MB)

 **Power Platform Request Consumption Analyzer**

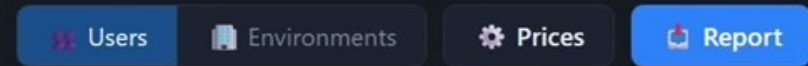

Analyze your Power Platform request consumption data. Upload a CSV file exported from the **Power Platform Admin Center (PPAC)**.

Supported **report types**:

#	REPORT TYPE	DESCRIPTION
1	Licensed User	Shows per-user SPR consumption for licensed users (Power Apps, Power Automate, D365, etc.)
2	Non-Licensed User	Shows consumption by non-interactive, application, and system users against the tenant-level pool
3	Per Flow Licensed Flows	Shows consumption by flows with per-flow or process licenses

Upload PPAC export

 **How to download your report:**

Period: Unknown period
